

MILLARDS EDUCATIONAL GUIDE

MILLARDS deeply care for its community and their well being. We want every member to work smartly and win this business like a WINNER. Hence we have decided to publish one educational guide where one needs to understand business deeply and make a full proof strategy to take maximum benefit of this wonderful opportunity and make difference in their own life and the one's who are associated with them in the business.

1- MOST IMPORTANT POINTS TO BE REMEMBERED BY NEW MEMBERS-

SELECTION OF UPLINE-

It's no coincidence that we don't just call a superior partner an upline, but a mentor. The thing is that you can't change referral link in the system once you are registered, which means that you will always stay with the upline, whose ID you specified during registration.

If your upline is inactive, is not engaged in team development, does not keep in touch with the invited participants (downlines), then you will miss a lots of profits and opportunities

On the contrary, a dedicated and savvy mentor will push the entire structure towards success, and together you will achieve more. They will hold call-ins and webinars, share helpful insights in a group chat or on a social media page. They will help to solve any problem and will eagerly share their experience with newcomers.

The solution is to study the activity of your upline and register to those who actively develop their structure and support their downlines. To see how active your potential mentor's structure is, go to

2- JUST STARTING AND THINKING THAT IT WILL MAKE YOU OVERNIGHT RICH WITHOUT EFFORTS.

"Just sign up, and the money will come all by itself! If you doubt it yourself, how will you convince others?"

Have you heard that one? If so, then you should know you have been deceived. To make a profit, you have to make an effort. It's not enough to just sign up and sit around waiting for millions. The only kind of passive income is the spillover, but its probability is small, and it's more like a pleasant bonus, but not the main way of earning. To earn a tangible amount and to make earnings regular, you have to work hard.

What exactly to do and where to start:

Learn all about MILLARDS. The Telegram Community, the free Webinars and support service will all help you.

Start communicating with like-minded people and learn from their experiences. To do so, join our Millards Educational groups and zoom meetings

Subscribe to the Official News and Announcement to learn about webinars and other important events.

Start taking action!

3- NOT TAKING IT AS SERIOUSLY AS YOU TAKE OTHER BUSINESS.

If you perceive MILLARDS as entertainment, or as an time pass, where you can throw in some extra change from your wallet and see what happens, then do not expect results.

To make an income comparable to your paycheck, you must devote as much time to Millards as you devote to your main job.

Look at the routines of those Millards participants who make thousands/Hundreds thousands of dollars.

They have team calls and online meetings with new affiliates every day. They read news about Millards, the crypto world and the economy in general. They are constantly improving their skills, taking courses, and looking for new tools.

The solution is to invest as much time and effort in Millards as much payback you want to get as it has the capacity to make you multi-Millionaire/Billionaire if you dare to believe and take inspired action towards your goal.

4- LET NOT NEGATIVE EFFECT YOU

Your income in Millards is directly dependent on the number of affiliates. This means that you must be constantly engaged in bringing in new members or motivating your team to expand the business. By doing this, you will hear not only positive but also negative responses. And the negative ones can exceed the positive ones, sometimes many times over. If you hear 10, 20, 30 refusals, you might want to give up. But it will not be the right thing to do as every business/leaders/businessman on the earth have faced such experiences before getting into big league.

The solution. You should not have a feeling of discomfort. You don't persuade, cheat or deceive — you generously share with the person a way to solve their financial problems. Be confident and trust that,Millards has no drawbacks — it is a transparent, honest, safe and simple system that will work as long as there is internet and electricity. If you yourself doubt it, how will you convince others? Study Millards for 200%, and doubts will disappear.

5-UNDERESTIMATING THE BUSINESS

The power of MILLARDS is that even with minimal effort you will quickly recoup your initial investment and make a small profit. Many people consider their mission accomplished at this point and abandon their Millards account.

The solution — do not stop where you are! You have possibly the most powerful and simple tool for achieving your financial goals right in your hands. You have the knowledge base, the Community support, all the resources and tools at your disposal. People just like you are making hundreds and thousands of dollars every day in Millards. If they can do it, you can do it, too.

The power of Millards is that, unlike other businesses, it is those who actively develop their structure who earn more, not those who have joined earlier. So, if you start now and be persistent enough, you can overtake the participants who came much before you. Go for it!

IMPORTANT BUSINESS TERMINOLOGY-

• UPGRADE-

UPGRADE is the activation of the next more expensive slot. Income from 1 cycle of each slot is enough to upgrade to the next slot. The reward for the upgrade goes to you and your upline as per distribution system, provided that they already have this level activated. You get to decide whether to activate the next slot or not. But if you do not have the next slot open, then the rewards from second cycle of this slot will be redirected to the upline or who have the respective slot above you.

You can overtake your upline partner by activating slots they have not yet activated. In such a case, you will occupy a spot in their closest upline partner's slot, provided that this partner has such a slot activated. The reward goes to him instead of your direct upline.

• SLOT FREEZE-

Slot freeze occurs if the partners have taken all the spots in the slots completing the first cycle, but your next slot is not activated (lack of upgrade). When the "frozen", slot remains inactive. Partners continue to occupy spots in your slot but you miss out on profits from this slot until the next slot is activated. and profit will pass on to those upline who have that respective slot.

• LOST PROFIT-

Lost profits are cases when you miss rewards for partners, and they are redirected to an upline partner. Lost profits can occur for two reasons:

A-Overtaking: You have not activated the slot that your downline partner has activated. This reward goes to the closest upline partner who activated this slot.

B-Freezing: Your slot is completely filled, and the 1st cycle has been completed, but the next more expensive slot is still not activated.

The best thing is, After you activate the slot, your partner will come back to you again in his next cycle.

• EXTRA PROFIT-

Extra profit is a reward that comes to you from below, because one or more of the downline partners have lost their profits. Thus, you can gain extra profits from the depth of your structure when your downline is overtaken, and you are the first in your structure who has this slot activated. Therefore, activation of higher slots allows you to receive such rewards for overtaking from downline partners

SPILLOVERS-

A- Spillovers is a process when spots in your slots are occupied not only by your personally invited partners, but also by partners invited by the other members of your team. Millards business platform allow you to receive spillovers from both your upline and downline partners

B- Spillover from above is a personally invited partner of your upline. They take the next free spot in the slot of your upline partner, and accordingly get in your slot too, but on the higher line.

C- Spillover from below is a personally invited partner of your downline.

D- Overtake is a situation when a partner overtakes their upline, and temporarily takes a spot directly below you. If your downline partner has this slot activated, in the next cycle this partner will take a place under their direct upline partner.

You can overtake your upline partner, acquiring slot which they have not yet activated. In this case, your reward goes to their closest upline partner, who has such a slot activated, and the income goes to them. Referral link allows you to return everyone to their places. This means that when your upline activates the required slot, in the next cycle you will take the spot under them again. Thus, the consolidation of personally invited partners is preserved forever.
